- Notes:
- "Smooth" can mean originally planed and then weathered/aged. It can also mean "less rough"; for example, NatureAged band-sawn is a smoother alternative to NatureAged circle-sawn. Antique/Reclaimed Smooth barnwood options are often heavy to brown tones. A high percentage of Trestlewood's barnwood lumber is rough sawn (meaning it was circle-sawn or band-sawn prior to aging).
 - Barnwood products almost always involve a range of color tones. Gray barnwood lumber will generally have more grays than browns, but will often have some brown tones as well. Likewise, brown barnwood lumber will generally have more browns than grays, but will often have some gray tones as well.
 - WeatheredBlend barnwood lumber involves a mix/blend of antique/reclaimed barnwood lumber and NatureAged, Harbor Fir, thermally modified, and/or other barnwood lumber.
 - Barnwood processing services often available at additional cost include: kiln drying, fumigation, edging (to more consistent width), thickness planing (to more consistent thickness), pressure washing, wire or nylon brushing, metal removal, and adding of profile (t&g, shiplap or wedgelap).
